Unfortunately, the original version of this article [1] contained some errors. The words “binding” has been spelt incorrectly in the fifth title of result section and legend of Fig. 5. And the image of GAPDH (Fig. 6D) has been mistakenly uploaded. The mistakes did not affect any correctness of our results or discussion. The corrected sentence Fig. 6 was provided here. We regret any inconvenience that caused.

“CS-6 inhibited NF-κB and p300 translocation and binding to COX-2 promoter”. “Figure 5 CS-6 inhibited NF-κB and p300 translocation and their binding to COX-2 promoter”.

1Zhenlong Yu and Wei Guo these authors contributed equally to this work.

Fig. 6 CS-6 inhibited the phosphorylation and activation of IKKβ. (D) A549 cells were treated with CS-6 (50 nM) after pretreatment with CB (50 nM). The IKKβ, and p-IKKβ proteins were analyzed by Western blotting.
